**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 and 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE10035622A1 in view of USPN 3,749,878 to Sullivan et al or in view of JP07112294A. See Figure 6 of DE10035622A1 which shows an inner tip, outer nozzle, and housing. JP07112294A describes (English Abstract) well known detachably fitting housing elements in a laser nozzle environment. The use of detachable nozzle elements are very well known as described by Sullivan et al (see Figures 2, 3, and 5). The claim limitation of being detachable does not impart patentability to the claims because the feature of making an element either detachable or integral is very well known and 'detachable' provides capability such as ease of part replacement.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE10035622A1 in view of USPN 3,749,878 to Sullivan et al or in view of JP07112294A as applied to claim 1 above, and further in view of USPN 5,477,026 to Buongiorno. Buongiorno shows (Figures 1 and 9) well known water coolant channels built into the laser powder nozzle. The use of well known coolant channels in a laser powder nozzle would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the coolant provides good control of apparatus

Art Unit: 1725

temperature. Describing the coolant chamber elements as a water jacket cover is merely a change in description and/or shape that does not impart patentability to the instant claimed subject matter over the prior art of record.

Claims 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE10035622A1 in view of USPN 3,749,878 to Sullivan et al or in view of JP07112294A and in view of Buongiorno as applied to claim 2 above, and further in view of Patent Application Publication No. US2004/0099643A1. Porous shielding covers are well known in the art as shown in US2004/0099643A1 (see Figure 6, element 19). The use of a porous gas shield would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the shield provides protection of the apparatus against debris.

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. Applicant argues detachable housing is not disclosed in DE10035622A1. This argument is not convincing. The claim limitation of being detachable is well known and 'detachable' provides ease of part replacement.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP§706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1725

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
